SUMMARY

Motivated Cyber Security student and Full-Stack Developer with a strong interest in artificial intelligence, software engineering, web development, and application development. Currently pursuing a B.Sc. in Cyber Security at New Uzbekistan University while actively developing practical skills in AI engineering and modern software technologies. Experienced in building real-world digital products, including Edify.uz and Adminify.uz, and contributing to projects through Wasp-AI. Strong ability to transform ideas into functional web applications and software solutions, with a growing specialization in AI, Computer Vision, and intelligent educational technologies.

EDUCATION

New Uzbekistan University

B.Sc. in Cyber Security

2024 – Present | 3rd Year

Rishtan Specialized School

2022-2024

KEY SKILLS

- Cyber Security: TCP/IP, HTTP/HTTPS, DNS, Network Architecture, Linux Networking, Basic Network Security, Authentication & Authorization
- Software Engineering: Full-Stack Development, Application Development, API Integration, System Design, Database Design
- AI Engineering: Python, Machine Learning, Deep Learning,
- Web: React, Next.js, TypeScript, Tailwind CSS, REST APIs
- Tools: Git, GitHub, Docker, Anaconda

LANGUAGES

- Native: Uzbek
- Second: English

PROFESSIONAL EXPERIENCE

Wasp AI

Jan 2026 - Present

Founder / Full-Stack & Application Developer

- SaaS Architecture: Engineered a full-scale educational platform serving 10+ learning centers and 300+ users, with a database of 100K+ test questions.
- Full-Stack Development: Built a high-performance Next.js web platform and native Kotlin/Jetpack Compose Android application using MVVM architecture.
- AI & Automation: Integrated AI-powered test generation and automated grading, reducing teacher preparation time by 50%+.
- Engagement & Security: Developed a gamification engine featuring XP and leaderboards, alongside anti-cheat mechanisms to improve exam integrity.
- Real-Time Synchronization: Implemented Firebase and Retrofit for reliable cloud synchronization between web and mobile applications.

FEATURED GITHUB PROJECTS

github.com/Axliyor-uz/AI--camera-attendance-

Focus: Python • OpenCV • DeepFace • Computer Vision • Face Recognition • AI

github.com/umidjon0339/edify-student (Main contributor)

Focus: Education Technology • Application Development • Student Management

github.com/Axliyor-uz/chem_solution_checker

Focus: Python • AI • Chemistry • Automated Assessment • EdTech

github.com/Axliyor-uz/wasp-ai-solution

Focus: AI Engineering • Full-Stack Development • Web Applications • AI Integration
